

Managing your healthcare business in today's climate is very challenging. You need the right tools and the right partners so that you can concentrate on the primary purpose of your practice: providing service to your patients. The *MD: Solutions* platform by MD Management Systems, LLC provides your practice with all of the tools you need to thrive in today's regulatory environment.

Here are the services that are offered:

- **Revenue Cycle Management** - Fast, Accurate Data Entry, Claim Editing, Submission. Provide continuous contact with your front desk staff. We handle all patient and insurance calls. We cut down expenses and speed up payment time by serving as our own clearinghouse.

- **Account Receivable Projects** - Recover aging receivables, instead of writing them off. Free up staff to concentrate on current A/R and other office tasks. Payments we collect go directly to you. You just send us copies of the EOBS.
- **Revenue Cycle Management System Hosting** - For those practices that would like the benefits of the MD Solution platform, but wish to continue their billing in-house, we offer a hosted solution.
- **Intelligent Front Desk Solutions** - Your front desk is the first point of contact for your patients, and is also the last contact they have with your office. As your practice gateway, your front desk needs to operate quickly and efficiently.
- **Document Imaging and Management** - Convert your papers into PDF documents. Import your documents into your EHR system. Eliminate the risk of lost or misfiled charts.
- **Clearinghouse** - No third party clearinghouse is involved. Clearinghouse services are offered as part of RCM service, RCM Hosting, or as a stand-alone service.
- **Chronic Care Management** - We assist you with compliance with the CCM program, per CMS guidelines, so that you get paid for these services.

For more information on how MD Management can help your practice or set an appointment, please contact us at 703.934.8818 or at leadership@msnva.org and we will be in touch within 24 hours.
